

SCIENCE BADGES

Dear Parent/Caregiver;

Your student has chosen to take part in an optional Science activity of completing a Science badge.

Your student has a sheet of activities from their chosen topic. They need to complete 20 stars worth of activities from that card to receive the appropriate Science badge. As they complete each activity they need to bring it or pictures of it in to show their teacher to get signed off.

There is a small charge of \$6 on completion of the badge to get the small pin (badge) that they have completed. These will then be presented in assembly.

The work for the badges may be used as extension work in class when other work is completed or can be worked on at home.

The website for the Science badges is <http://www.sciencebadges.co.nz/badges.html> if you would like more information or please ask your students teacher.

Regards,

Mr Gorrie
